

# Onboarding Module

# Home Page

Staffs can manage their shift time and managing their responsible stores on main page

# Manager's Store Module

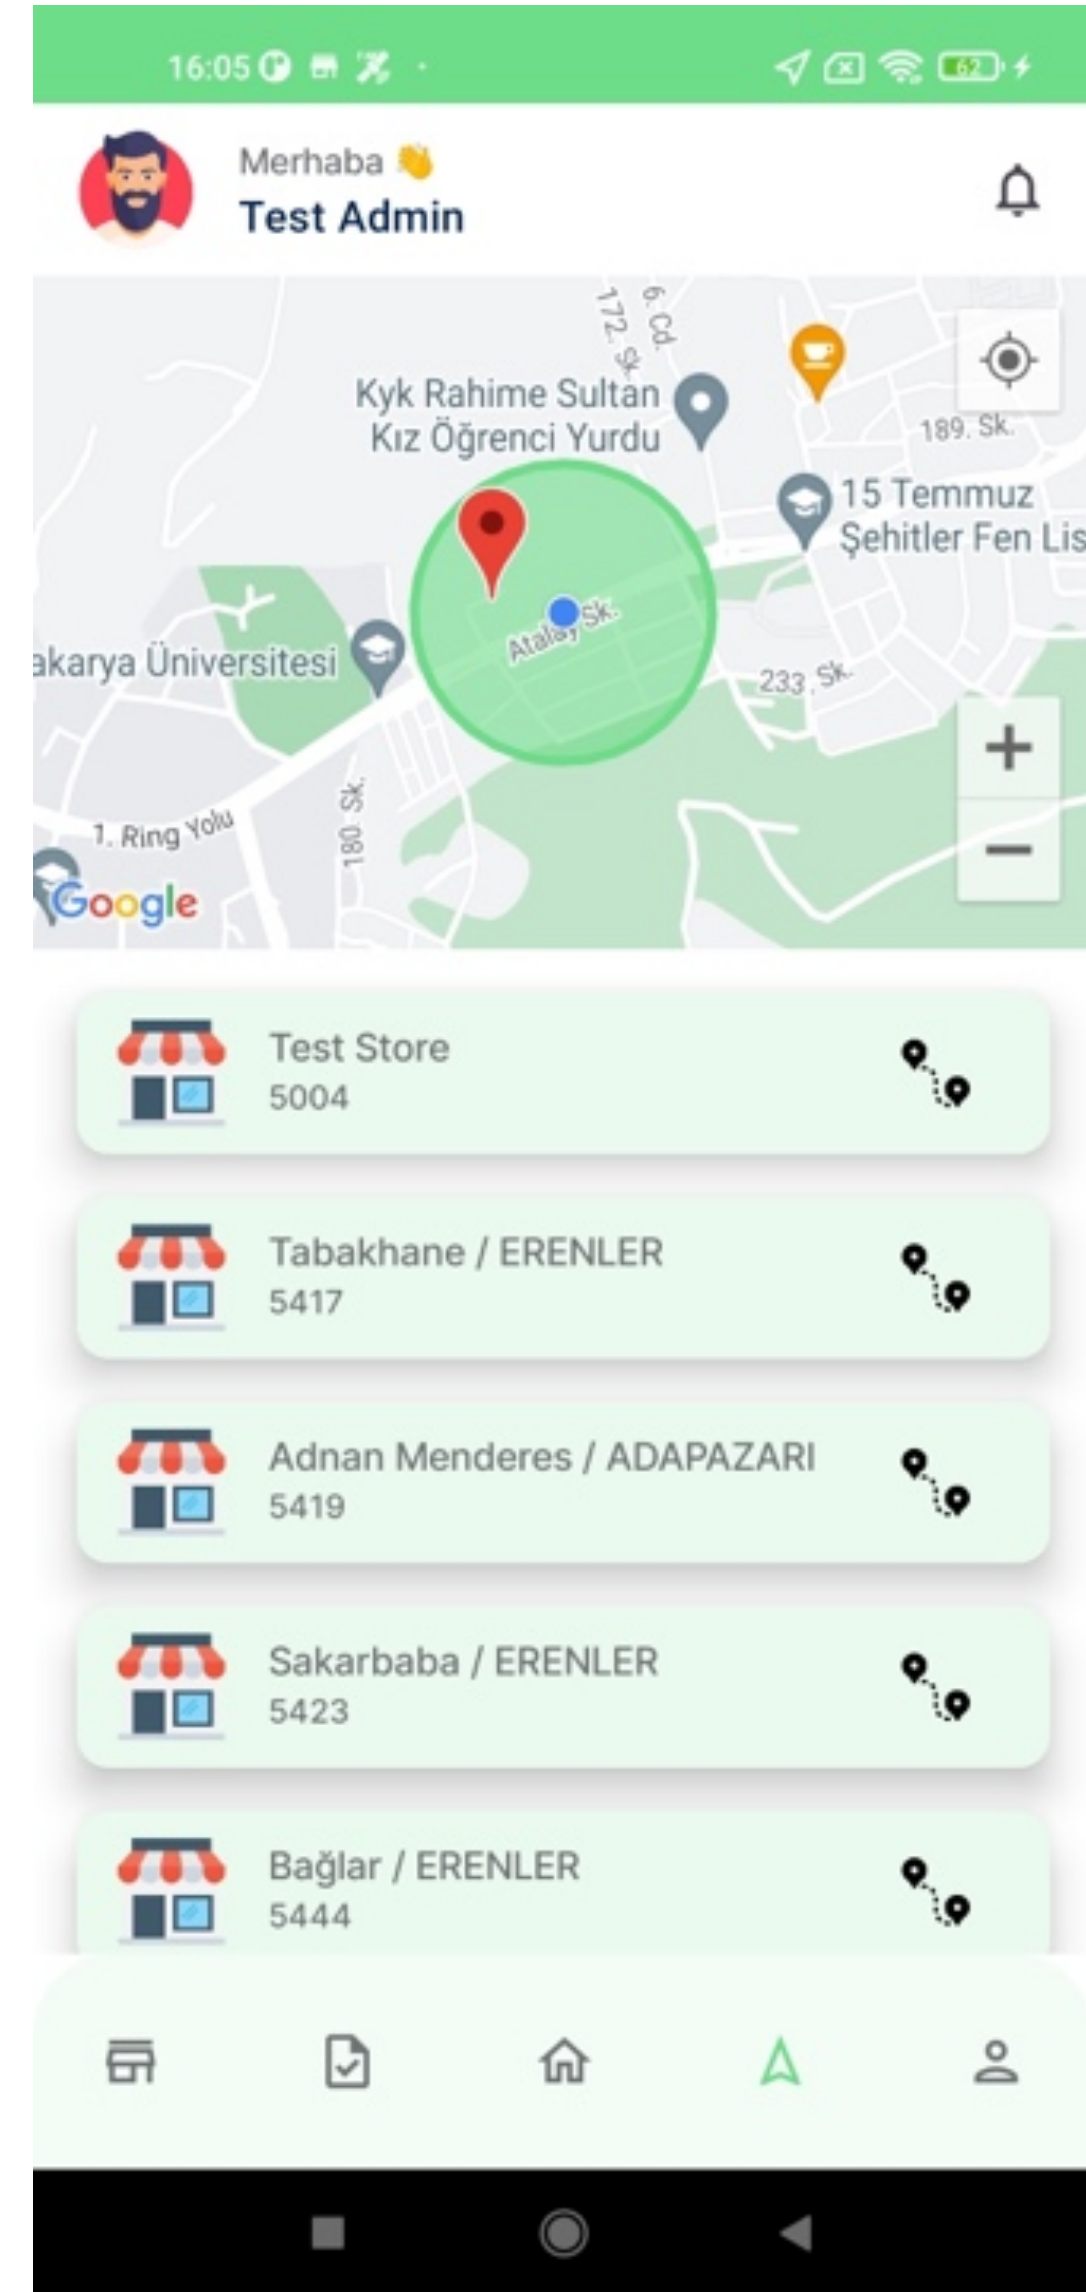

Employees can view other stores for which their managers are responsible from here.

---

# Navigation Module

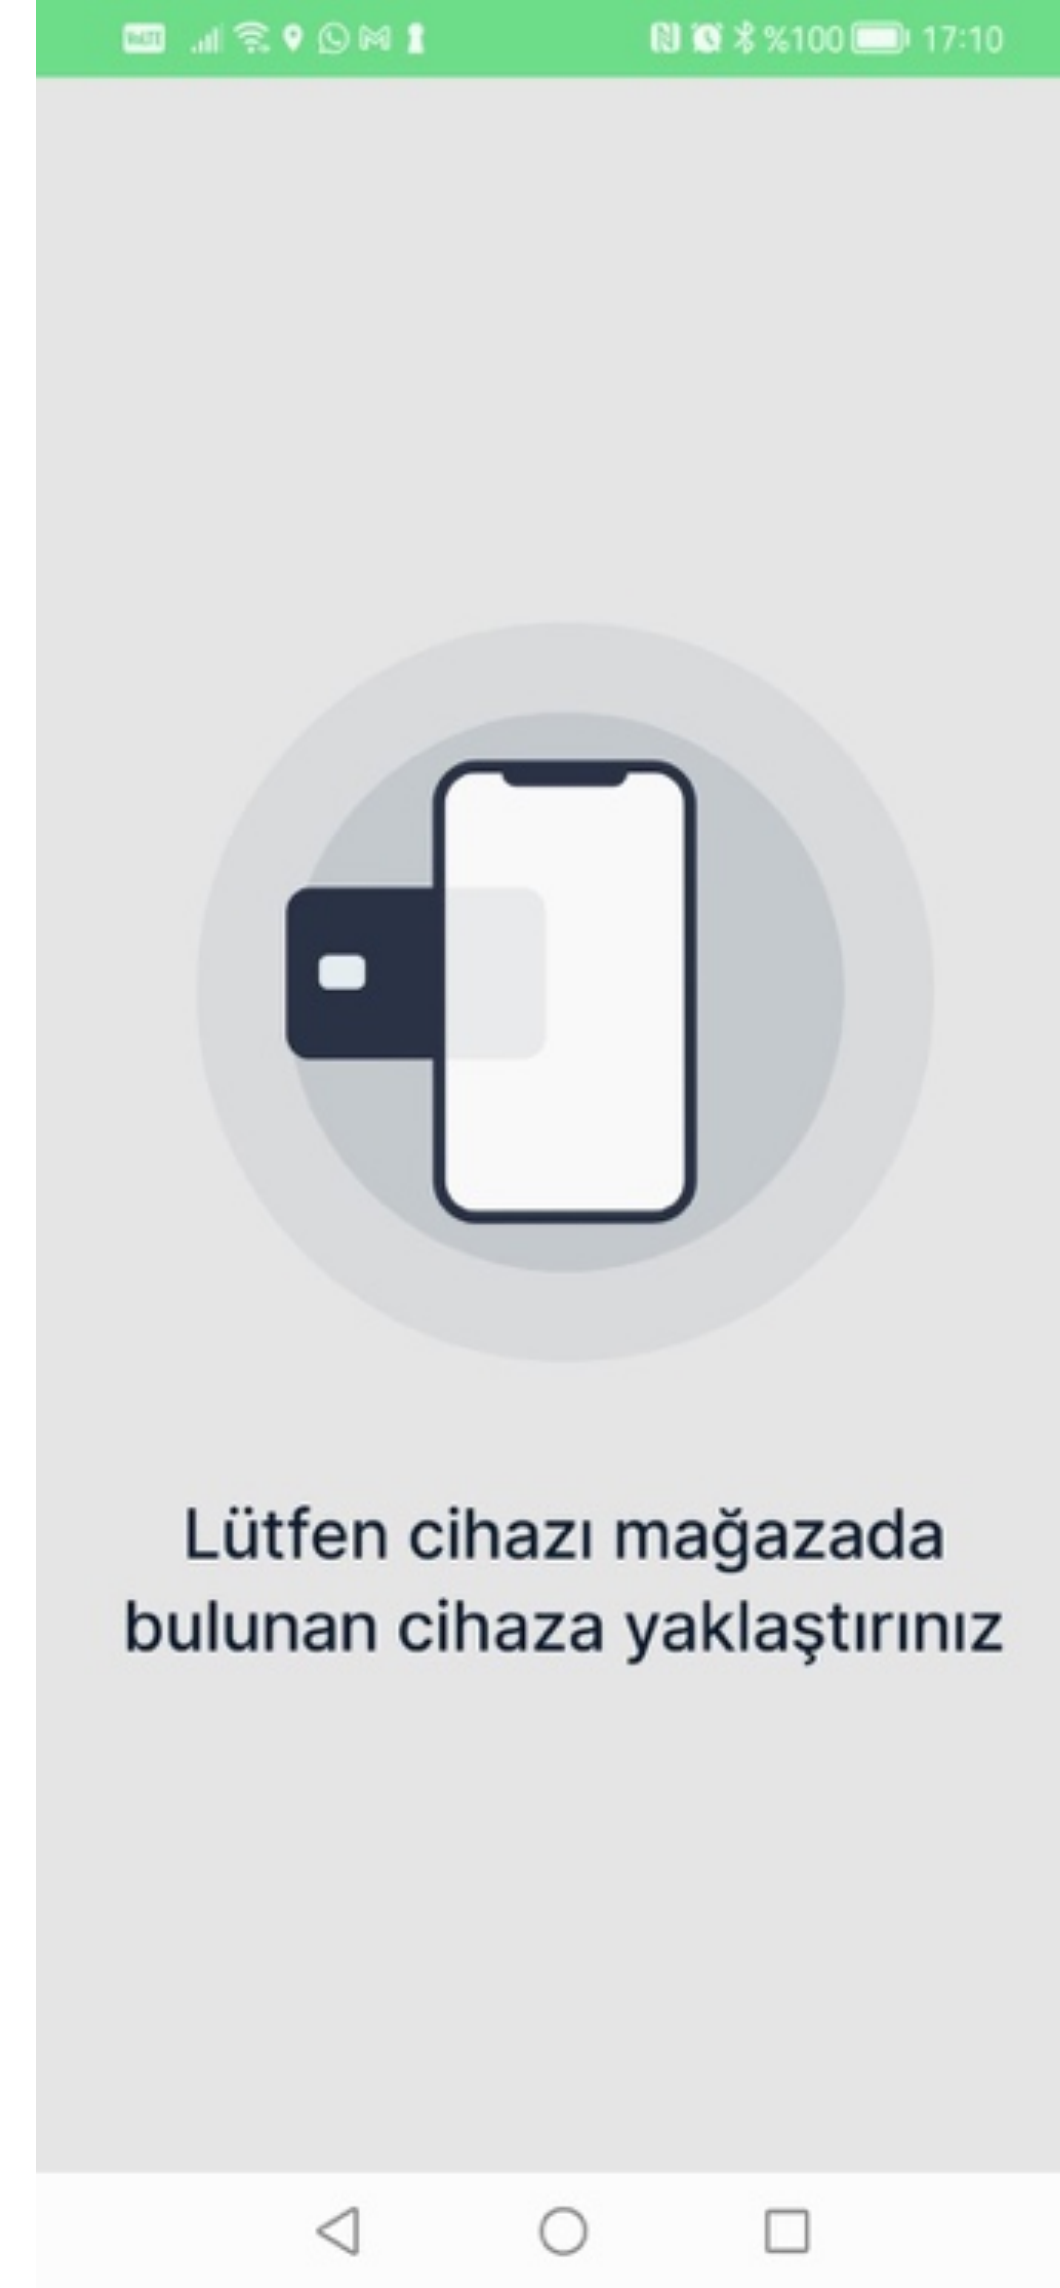

Employees can get directions to other stores using Google Maps from here. Additionally, they can initiate working hours for stores within their range using the green circle on the map.

# NFC Module

Employees can use their device  
to initiate their working hours via  
NFC

---

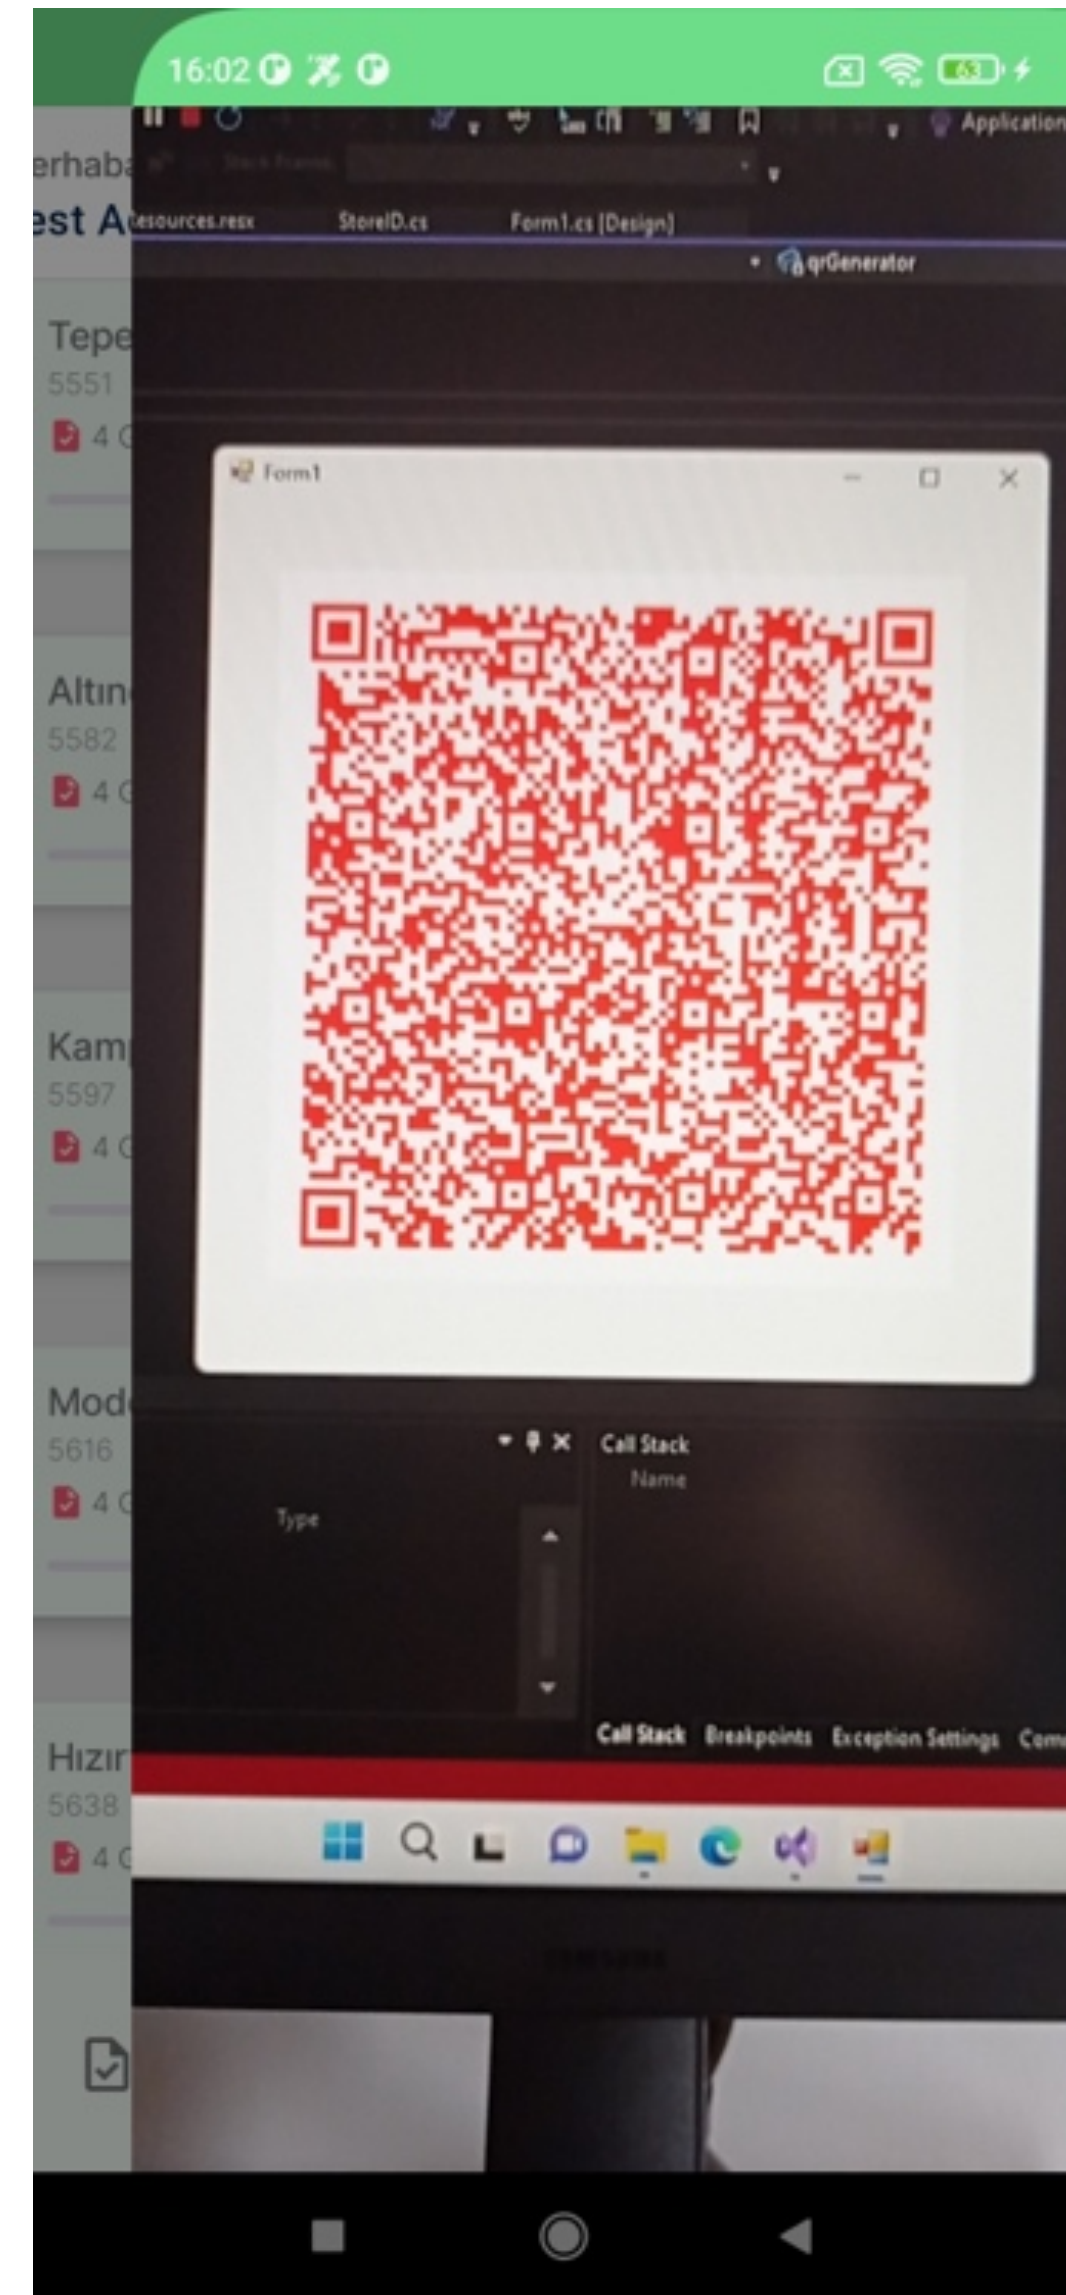

# QR Scanning Module

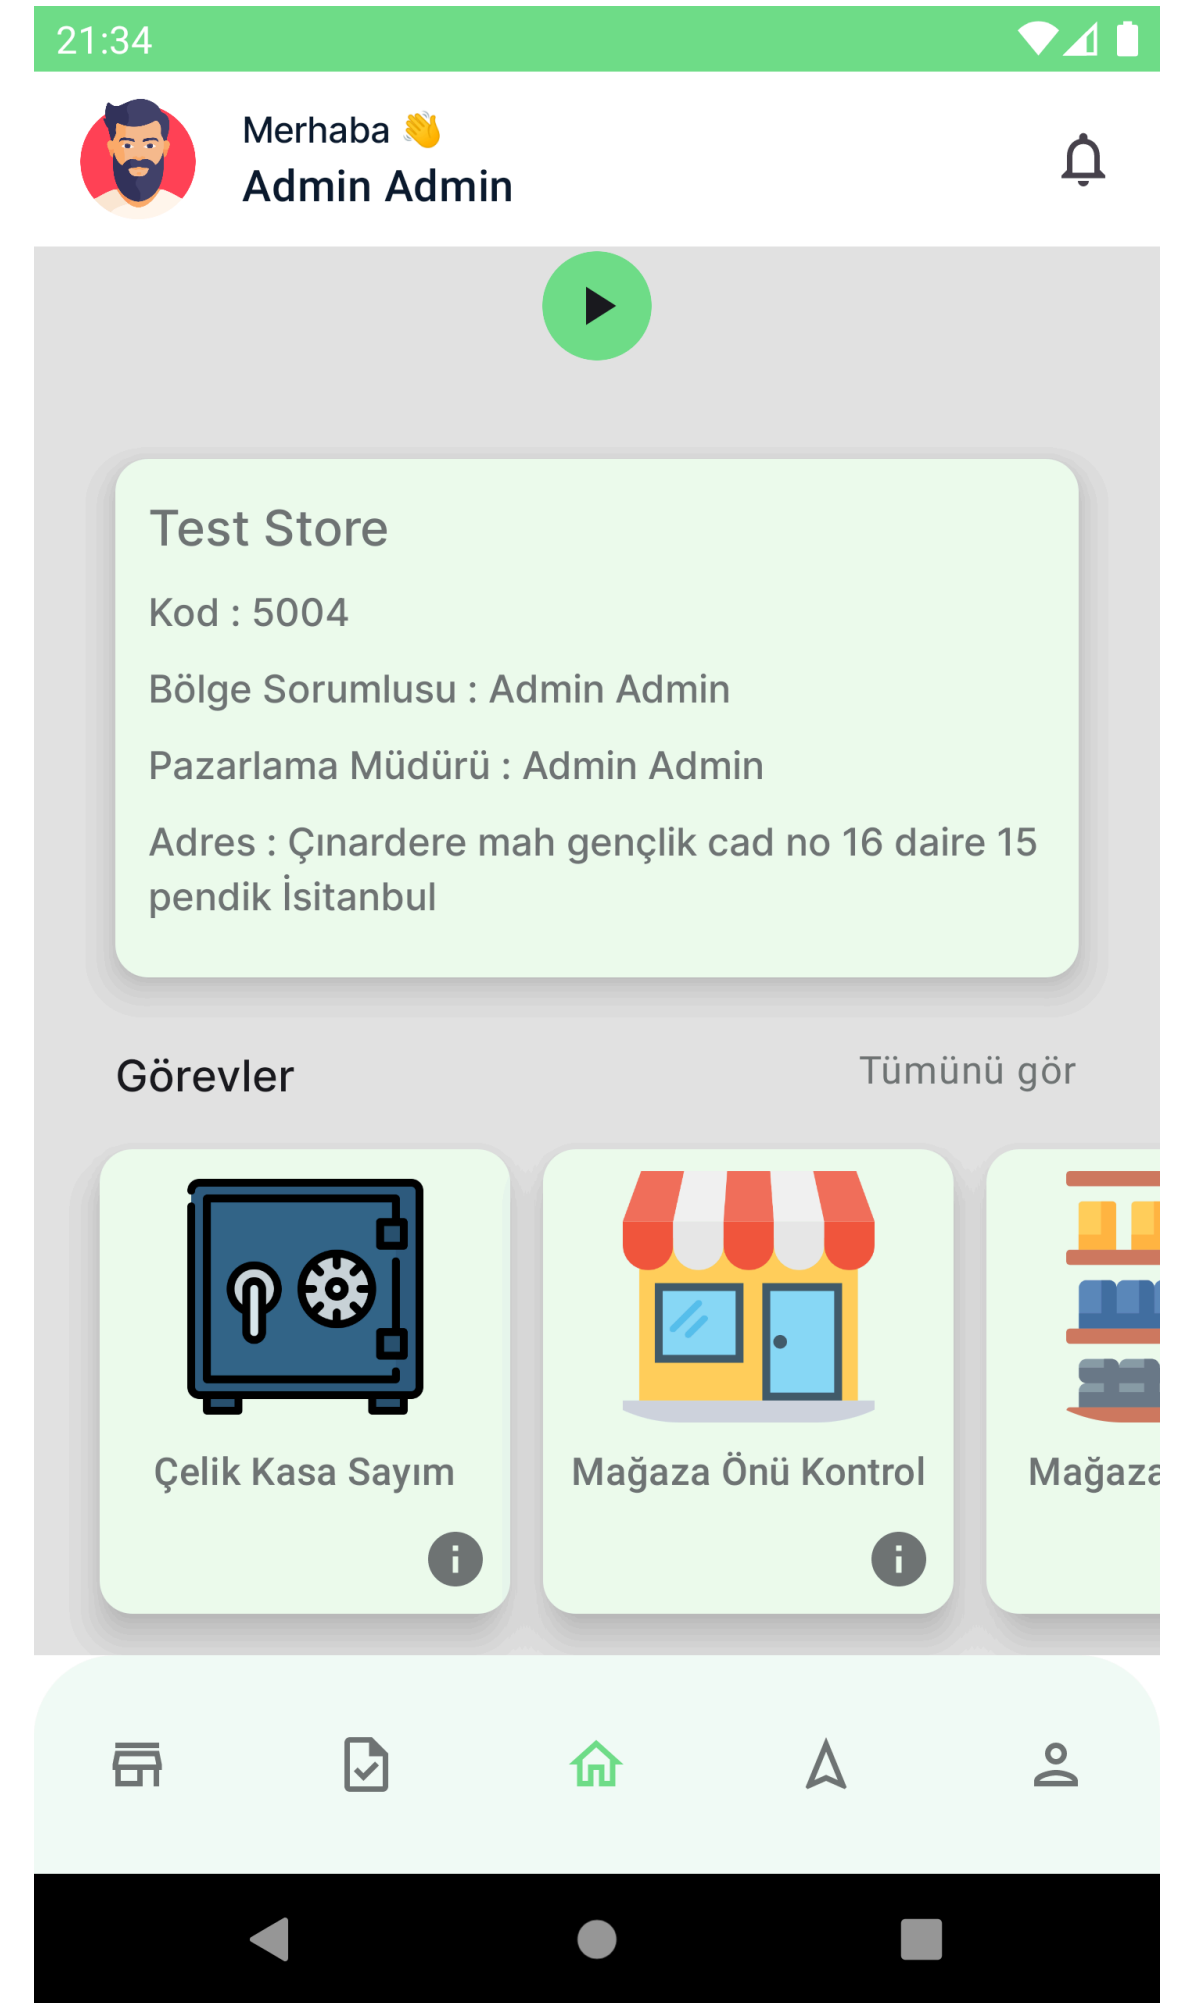

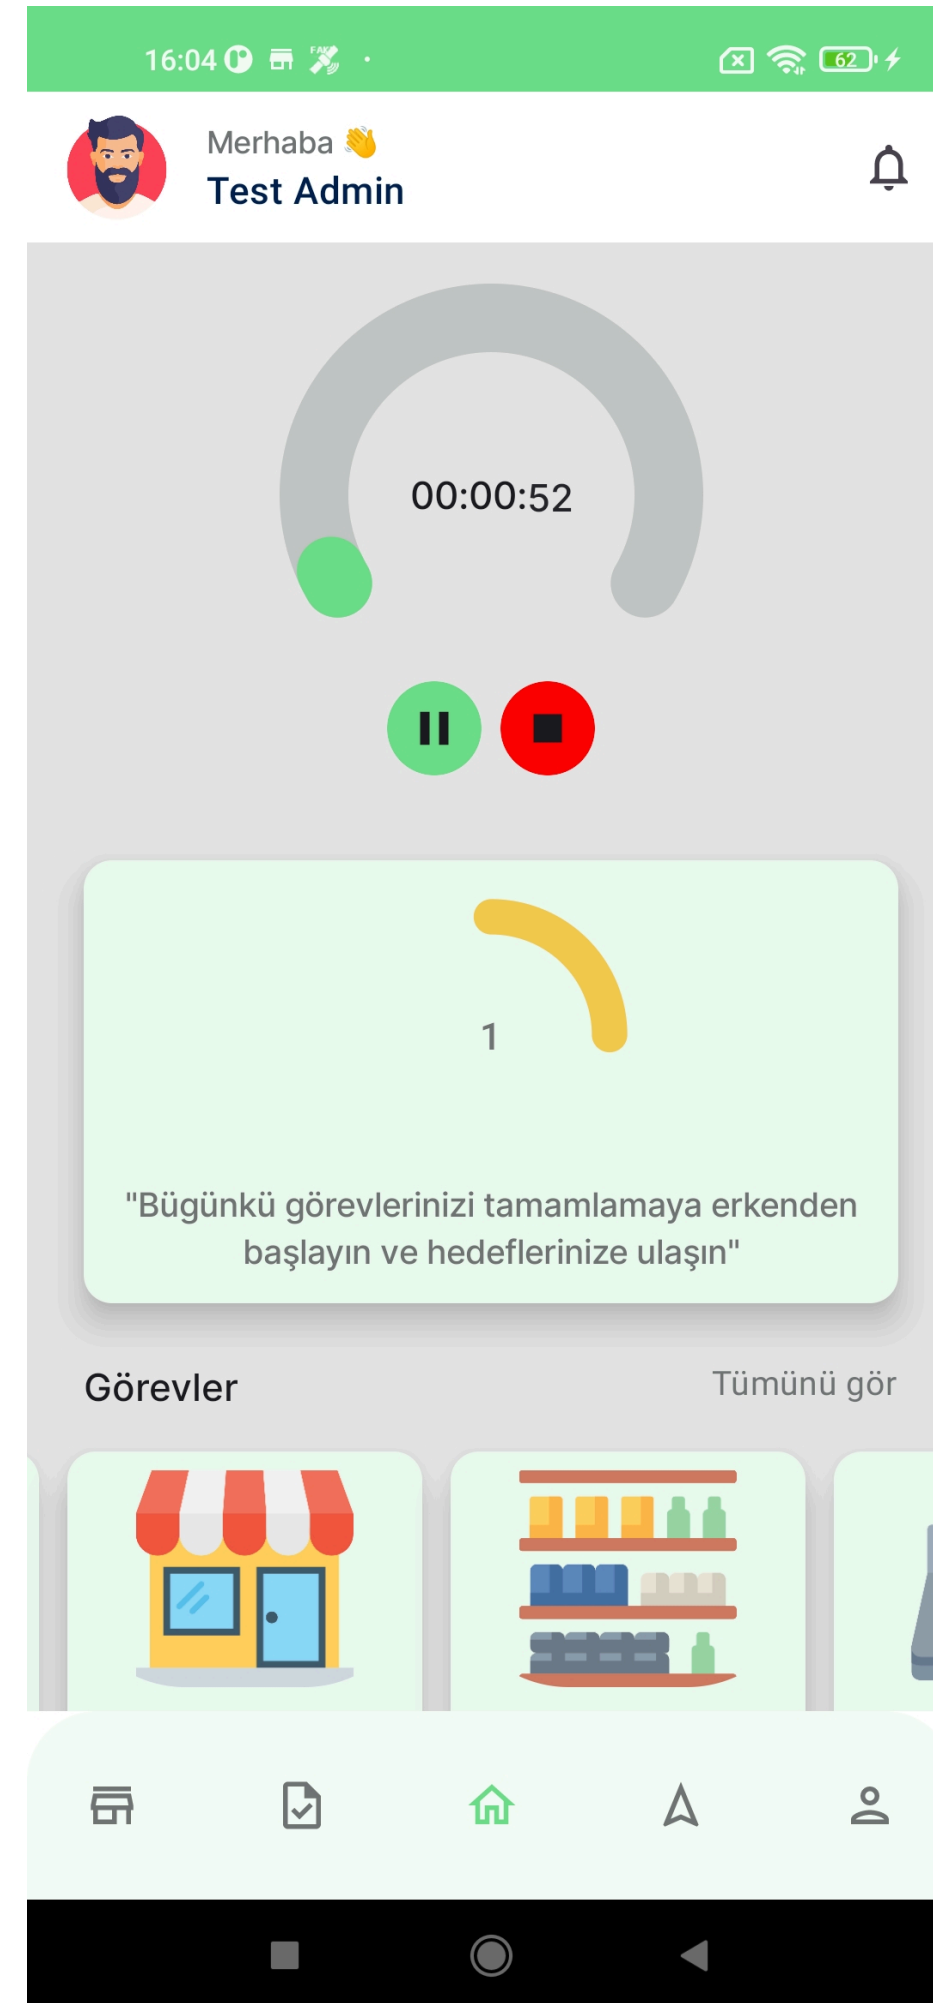

Employees can use QR scanning if they don't have NFC to initiate their working hours

---

# Store Module

After location verification, employees can access this screen by passing through NFC or QR code verification. Employees can not manage store working hours from here, and they can also easily access information about stores and store tasks

# Store Tasks Module

Employees can complete various store tasks from there
